

Harishwar Sagar

Revenue Operations & Go-To-Market (GTM) Professional

Bangalore, India (Remote - full US EST/PST overlap) | SagarHarishwar@gmail.com | +91 9686463291 | linkedin.com/in/harishwarsagar | harishwarsagar.com

PROFESSIONAL SUMMARY

Revenue Operations (RevOps) and Go-To-Market (GTM) professional with a rare technical-builder edge - an engineering background (DevOps, SQL, APIs) applied to full-funnel revenue growth. I run the strategy (pricing, forecasting, profit-and-loss, demand generation) and build the systems (Customer Relationship Management (CRM) architecture, lead routing, and automation across the GTM stack). Scaled a venture ~10x on daily revenue at ~50% gross margins and cut operational admin ~60% with a custom "Revenue OS"; fluent across HubSpot, Salesforce, Clay, Apollo, and Looker, with daily US-stakeholder communication experience.

CORE SKILLS

Revenue Operations: RevOps process design, pipeline management, forecasting, P&L analysis, unit economics (CAC, LTV, ROAS), pricing & discount strategy, marketing-budget optimization, deal desk & quoting

GTM & Demand Generation: Full-funnel acquisition, paid media (Google, Meta, YouTube, LinkedIn), SEO & GEO, marketplace growth, outbound & cold email, A/B & split testing, landing pages & funnels, Conversion Rate Optimization (CRO)

CRM & GTM Tech: HubSpot (CRM & Marketing), Salesforce, Clay, Apollo, LinkedIn Sales Navigator, Hunter, Instantly, Looker, Google Analytics (GA4)

Automation, Data & AI: n8n, Zapier, Make, Webhooks, SQL, Python, REST API integrations, agentic AI workflows and AI build tools (Claude Code, GPT/Codex, Gemini, Gemini Antigravity)

PROFESSIONAL EXPERIENCE

GTM & Revenue Operations Lead

Snack Theory (Cloud Kitchen division of The Good Chef) | Bangalore, India | Jun 2025 - Present

Promoted from The Good Chef to own the full go-to-market and revenue engine end to end.

- Scaled daily revenue ~10x by owning the entire funnel - paid media (Google, Meta, YouTube, LinkedIn), SEO & GEO, Google Shopping and local listings, and marketplace partnerships (Swiggy, Zomato, JustDial).
- Engineered a custom "Revenue OS" across n8n, Zapier, and Webhooks that automated orders, inventory, and finance reporting - cutting manual operational admin ~60% and surfacing real-time revenue insight.
- Owned profit-and-loss (P&L) analysis, pricing/discount strategy, and marketing-budget optimization - growing sales on an efficient, limited budget while holding ~50% gross margins.
- Built the full acquisition system (traffic to landing pages to funnels to quote to close), won recurring corporate accounts, and ran continuous A/B testing plus quality-control and customer-lifecycle checks that lifted deliverability and retention.

Revenue & Growth Manager

The Good Chef (B2B Catering and Events) | Bangalore, India | Jul 2023 - Jun 2025

- Managed the full-cycle business-to-business (B2B) sales process from lead generation to close, converting and retaining corporate clients including Unacademy and HSBC into recurring relationships.
- Maintained a 33% close rate on inbound leads through discovery calls, objection handling, and high-value proposal positioning.
- Owned pricing authority and deal structuring at a strict 50% gross margin, and built the early demand engine (job portals, Bark, Google Business, Google Ads) with end-to-end vendor coordination.

DevOps Engineer

Oracle (Cerner Healthcare) | Bangalore, India | May 2022 - Jul 2023

- Primary engineering liaison on daily calls with US-based stakeholders - translating technical fixes into business value and supporting sales teams in advancing deals.
- Led technical demonstrations and product updates for decision-makers, framing complex deployments as actionable return on investment (ROI).
- Built automated CI/CD pipelines (GitLab, Jira automation, Chef), reducing build/release failures 40%+; designed Amazon Web Services (AWS) solutions to customer requirements.

Software Engineer

Checkpoint Systems | Bangalore, India | Nov 2020 - May 2022

- Engineered cloud infrastructure (Azure, Docker, Kubernetes) at 99.9% uptime; built automation scripts (Python, Shell, Selenium) and full-stack features (Node.js, React.js, SQL).

ADDITIONAL GROWTH PROJECTS

Dyeme.co (direct-to-consumer e-commerce): 2.8-3x return on ad spend (ROAS); lifted checkout conversion 1.2% to 3.5%.

Escape Limits (travel-tech): lifted ad-to-booking conversion 5% to 40% (8x) and scaled to 150+ monthly customers across 10 locations.
